Alasasin Mariveles Bataan Phillippines

TECHNICAL EXPERTISE

Frontend Development

- JavaScript (ES6+), TypeScript
- React.js, Next.js, Vue.js
- HTML5, CSS3, Tailwind CSS

UI/UX & Interactive Design

- UI Libraries: shadcn/ui, Aceternity UI
- Animations: Framer Motion
- Responsive Design: Mobile-first development, cross-browser compatibility

Performance Optimization

- Core Web Vitals: Lazy loading, code splitting
- Image Optimization: WebP conversion
- Lighthouse & PageSpeed Insights improvements

CMS & Backend Integration

- Headless CMS: Sanity.io, WordPress (custom themes/plugins)

SEO & Analytics

- Technical SEO: Meta tags, structured data, sitemaps
- Google Tools: GA4, GTM, Search Console

Tools & Workflow

- Version Control: Git, GitHub
- Build Tools: npm, pnpm, Vite, Webpack

Build Tools & Performance

- Modern Tooling: Vite, Webpack
- Package Managers: npm, pnpm

PROGRAMMING LANGUAGE

- JavaScript
- C++
- COBOL
- Visual Basic
- Java

WORK EXPERIENCE

Front-End Developer

Central One Bataan Inc.

April 5, 2024 to August 10, 2024 - Retrenchment

Key Responsibilities & Technical Contributions - Web Development & Management

- Frontend Development: Built and maintained responsive websites using:
 - Core Web Technologies: HTML, CSS, Vanilla JavaScript + TypeScript
 - Frameworks/Libraries: React.js, Next.js (TypeScript), Vue.js
 - Styling: Tailwind CSS
 - CMS Integration: Sanity (for headless content management in Next.js & React.js)
 - WordPress: Custom themes/plugins and site management

Performance & Optimization

- Speed Optimization: Improved page load times via code splitting, lazy loading, and efficient bundling.
- Image Optimization: Compressed and delivered modern formats (WebP) for faster rendering.
- Mobile Responsiveness: Ensured cross-device compatibility with responsive design principles.

SEO & Analytics Implementation

- Technical SEO:
 - Implemented meta tags, structured data (Schema.org), XML sitemaps, and robots.txt.
 - Managed Google Search Console integration (site verification, indexing control).
- Tracking & Analytics:
 - Configured Google Analytics 4 (GA4) for user behavior tracking.
 - Deployed Google Tag Manager (GTM) for event tracking without code deploys.

Front-End Developer

Suman Gupta

IG - @sumangupta1892, CP - +917837941922

Freelance work started in August 12, 2024 up to the present - absorbed by my previous companies' client

Key Responsibilities & Technical Contributions

Web Development & Management

- Frontend Development: Built and maintained responsive websites using:
 - Core Web Technologies: HTML, CSS, Vanilla JavaScript + TypeScript
 - Frameworks/Libraries: React.js, Next.js (TypeScript), Vue.js
 - Styling: Tailwind CSS
 - UI Libraries: shadcn/ui (customizable components), Framer Motion (animations/micro-interactions), Aceternity UI (modern React components)
 - CMS Integration: Sanity (for headless content management in Next.js & React.js)
 - WordPress: Custom themes/plugins and site management

Performance & Optimization

- Speed Optimization: Improved page load times via code splitting, lazy loading, and efficient bundling.
- Image Optimization: Compressed and delivered modern formats (WebP) for faster rendering.
- Mobile Responsiveness: Ensured cross-device compatibility with responsive design principles.

SEO & Analytics Implementation

- Technical SEO:
 - Implemented meta tags, structured data (Schema.org), XML sitemaps, and robots.txt.
 - Managed Google Search Console integration (site verification, indexing control).
- Tracking & Analytics:
 - Configured Google Analytics 4 (GA4) for user behavior tracking.
 - Deployed Google Tag Manager (GTM) for event tracking without code deploys.

MICHAEL TUPAS CARDOSE

WEB DEVELOPER / FRONT-END DEVELOPER

DATABASE

Non-Relational Database

- MongoDB

Relational Database

- Microsoft SQL
- MySQL

WEB DEVELOPMENT

- HTML, CSS, JavaScript + TypeScript

Front-end Frameworks/Libraries:

- NextJS, ReactJS, VueJS

Back-end Technologies:

- Framework - ExpressJS
- Runtime - Node.js
- API Development - REST

Styling:

- Tailwind CSS

UI Libraries:

- shadcn/ui
- Framer Motion
- Aceternity UI

CMS:

- Sanity

OPTIMIZATION

Speed Optimization

Image Optimization

Mobile Responsiveness

BASIC SEO

- Meta Tags, Schema, Sitemaps, Robots
- Google Tags, Google Analytics

WORDPRESS DEVELOPMENT

- Elementor
- Divi Builder
- Astra
- Beaver Builder

VERSION CONTROL

- Git
- Github

WEB HOSTING

Vercel

Digital Ocean Server - Linux Based

- Putty, Putty Gen
- SSH key
- WinSCP
- PM2
- Nginx

WORK EXPERIENCE

WordPress Developer

Randall J. Borden Law Firm

August 25 - September 14, 2025
Freelancing - Project Based

Key Responsibilities & Technical Contributions

WordPress Environment Setup & Development

- Set up a full WordPress local environment for safe development and migration.
- Analyzed and worked within the Theme File Editor, including navigation template modifications.
- Migrated the live site into WP Local to ensure secure testing and development.

Navigation Redesign & Responsive Layout

Blog Post Development

Website Optimization & UI Enhancements

- Optimized logo assets and improved visual clarity.
- Added gradient styling to the hero section and CTA button hover animations.
- Fixed homepage responsiveness issues across mobile breakpoints.

SEO & Analytics Implementation

- Updated meta titles and descriptions for improved search visibility.
- Reviewed and verified sitemap and robots.txt functionality.
- Integrated Google Tag Manager, Google Analytics, and Bing Webmaster Tools for tracking and analytics.

Speed Optimization

- Improved overall page load performance through targeted optimization.

Additional Deliverables

- Built a Daily Time Tracker in Google Sheets with automated chart visualization for productivity monitoring.

WordPress Developer

HIREAWIZ Web Design & Digital Marketing

October 1 - November 1, 2025
Freelancing - Project Based

Key Responsibilities & Technical Contributions

Built and maintained WordPress pages using Beaver Builder, ensuring clean layout hierarchy, proper spacing, and modern UI design.

Customized modules, row/column structures, and global styling to match brand guidelines.

Enhanced responsiveness across devices, fixing layout shifts, spacing inconsistencies, and mobile-specific issues.

Integrated custom CSS for advanced styling when Beaver Builder modules had limitations.

Collaborated on template adjustments and theme edits to achieve exact client specifications.

EDUCATION

Polytechnic University of the Philippines

Bachelor of Science in Information Technology

2017 - 2021

Internship

Barangay Alasasin

July - September 2021

University Projects

Library System

- Using Java Programming Language and MySQL.

iTech Payroll System

- Payroll system with time in/out and HR Management System.
- Using Visual Basic Programming Language and Microsoft DBMS.

iChurch

- RFID Attendance Management system with HR Management System and SMS Messaging via sms messaging .apk (Prototype).
- Using Visual Basic Programming Language and Microsoft DBMS.

MICHAEL TUPAS CARDOSE

WEB DEVELOPER / FRONT-END DEVELOPER

OTHER SKILLS

- Troubleshooting Skills
- Photoshop, Figma, Canva
- Wireframing
- Basic Knowledge with UX/UI designing

TRAININGS

Full Stack Training - MERN

ASG Platform

March 2023 - June 2023

- Web Application Project using NodeJS, ExpressJS, ReactJS, MongoDB.
- Digital Ocean Server - Hosting
- Learning JavaScript, HTML5, CSS3, Git, MongoDB, NodeJS, NodeJS Security, NodeJS and ExpressJS Restful APIs, ReactJS Hooks, State Management and Redux, Puppeteer.

NOTABLE PROJECTS

Portfolio Website

<https://michael-cardose.vercel.app/>

Core Framework:

Next.js with React for server-side rendering and component-based architecture

TypeScript for type-safe development

Styling & UI:

- Tailwind CSS, Shadcn/ui for accessible UI components, Framer Motion (v11) and React Spring (@react-spring/three) for animations

3D & Interactive Elements:

- Three.js (with @react-three/fiber and @react-three/drei) for 3D rendering, Three-Globe for geographic visualizations

State & Theming:

- Next-Themes for dark/light mode toggle

Build & Deployment:

- Vercel for hosting and CI/CD

GlowSimcha B2C Web App

- Under Construction

<https://glow-simcha.vercel.app/>

<https://github.com/Michaelcarduce/glow-simcha>

<https://github.com/Michaelcarduce/gsap>

<https://github.com/Michaelcarduce/gstart>

Core Framework:

Next.js 15 with React 19 for modern server-side rendering and client/server components

TypeScript for type-safe and scalable development

Authentication & Security:

- Better-Auth with Prisma Adapter for secure auth flows, bcryptjs for password hashing, Zod for schema validation across client and server

Global State & Logic:

- Zustand for lightweight global state management, Luxon for advanced date/time manipulation

Styling & UI:

- Tailwind CSS 4, Tailwind Merge & clsx for utility-class composition, Lucide React for iconography, Radix UI components (Label, Radio Group, Slot), Sonner for modern toast notifications, EmojiMart for emoji picker UI

Maps & Location Features:

- Leaflet + React-Leaflet for interactive mapping

AudioScribe - Web Application

<https://github.com/Michaelcarduce/AudioScribe4.git>

Web Application project for my previous working assessment that has Text-to-Speech, Speech-to-Text, Remove/Replace Audio from Video, Registration and Login, Password Encryption, Displaying Users Information with Chakra UI functionalities using Node js, Express js, React js, MongoDB and Digital Ocean Server for Deployment

MERN Chat Application

<https://github.com/Michaelcarduce/Chat-App.git>

Chat Application using Node js, Express js, React js, MongoDB and socketio for real time communication and notification (self study)
